- Types / Colours: Colours available are: Black, light brown, red brown, white, bleached, red, violet, pink, blue, light green, dark green and yellow. Also available are silkworm & linen embossed glassine.
- Sizes: Cut to your requirements or as rolls

Application Recommendations

- Liner in boxes where grease resistance is required
- Protective packaging for chocolates, sweets, biscuits.
- Presentation in boxes for quality products

DATA SHEET – WAXED PAPERS

About The Product

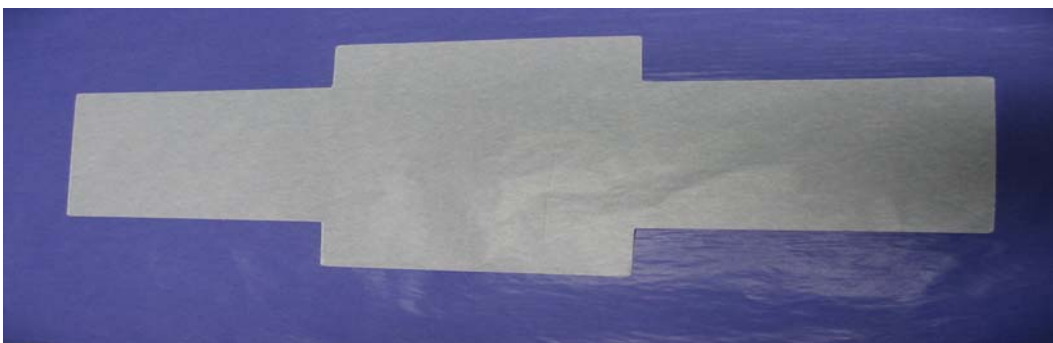

Any paper can have a wax coating applied. Waxed paper is commonly used for wrapping toffees or as a decorative box liner for added value or protection purposes. It can be printed up to 8 colours. Versatile material with good folding properties. Can be used as a release liner.

Properties

- Grammage : Stock Grammages Between 28gsm to 62gsm. Various other grammages and specifications can be supplied on request.
- Types : Both low and high gloss available ex stock
- Sizes: Cut to your requirements or as rolls
- Heat Sealable
- Excellent Twistwrap

Application Recommendations

- Wrapping Sweets
- Protective packaging for toffees
- Interleaving / Layer sheets

DATA SHEET – SILICONISED PAPERS

About The Product

Widely used for baking applications but also suitable for chocolatiers etc... because of the release properties of silicone particularly when handling caramels and similar products.

Properties

- Greaseproof or vegetable parchment is available both siliconised and unsiliconised.
- Grammage: From 41gsm – 80gsm. 41, 45, 50 and 60gsm ex stock.
- Colours: Predominantly white or blue but other colours are available.
- Sizes: Normally supplied in 500x750mm reams but other sizes can be cut.
- Print is only available for larger quantities as material has to be printed before siliconising.

Application Recommendations

- Chocolates
- Caramels / toffees
- Biscuits

DATA SHEET – CUSHION PADS & CORRUGATED

About The Product

Used as a protective and decorative medium, offers cushioning and protection to the chocolates in a box. Predominantly made from glassine but other materials can be used. Can be printed to individual requirements to add value to their product.

Properties

- 3, 5 and 7 ply available in glassine, greaseproof or even with plastic or metallized layers.
- Grammage: Thickness from 2-8mm
- Colours: Any glassine colour, normally black or white with many variations of colour due to the ease of printing.
- Sizes: Any size or shape.
- Print 1 to 8 colours Flexo or Gravure.

Application Recommendations

- Chocolates
- Biscuits
- Protection
- Presentation

DATA SHEET - FILMS

About The Product

Polypropylene and cellulose films are largely used for overwraps or interleaving. They offer superb clarity for product display and depending on the type of coating and film quantity, product protection against environmental influences.

Properties

- Dependent on film quality offers barrier against moisture, fat, gases and odours. Provides good dead fold.
- Grammage: 20 – 50 micron
- Colours: Normally transparent or coloured with 100% tints
- Can be printed usually flexo 1-4 colours but up to 8 colours is available.
- Will not discolour in the light.

Application Recommendations

- Layer Sheet
- Interleaving
- Ingredients Sheet

DATA SHEET - CRIMPED CASES

About The Product

Used to hold individual chocolates in a tray or box. Normally plain, black or white. Although nowadays more cases are being branded using various print methods. Latest developments also have resulted in more coloured glassines being used.

Properties

- Good product protection, easily printed and personalised.
- Grammage: Most common usage 40 – 50gsm
- Colours: Black and white glassine any quantity, other colours available depending on slip-easy coated material being in stock.

Application Recommendations

- Individual chocolates in boxes
- High presentation of branded chocolates
- Petit four's for sweets and chocolates
